**mehron**

**Easy  
Step-by-Step  
Instructions**

**Step 1** – Start with a clean surface

**Step 2** – Roll the wax in the hands to soften and warm the wax. Apply the wax to the desired area and work the edges into the skin. (Hint: Using a little mineral oil on the fingers and tools will remove the tackiness, then blot off the excess) Use a non-sharp tool to make a cut in the wax and peel back the opening.

**Step 3** – Apply the “Monster Grey (or Green) foundation over the exposed skin. Then lightly press Mehron’s Colorset Powder with the powder puff into the foundation, dust off the excess powder.

**Step 4** – With a sponge apply the white to the boney areas around the face, above the eyes, along the cheekbone and jaw line and on top of the nose. Blend the edges of white so they fade into the foundation. Lightly powder these area with Mehron Colorset Powder as mentioned in Step 4.

**Step 5** – With a sponge apply the black to the eyes then a small amount to the sides of nose, above the chin and to the fold between the nose and mouth. Blend the edges and powder as mentioned in step 4. Take the black pencil and draw the stitches to desired areas.

**Step 6** - For additional detail apply the red to the open wound in the wax. You may also apply some green or gray around the white for additional contrast

Add a scary costume and have fun.
